S. N. E. T. MEN FEAR ABOUT FIRST AID

Dr. Spier, Police Surgeon of New Haven, Talked to Telephone
Men in This District—Demonstration of Artificial Res-
piration—Bandaging and Stopping Flow of Blood Ex-
plained.

A very practical talk on First Aid to the injured was given before an audience of about 200 telephone men at the Y. M. C. hall on Thursday evening by Dr. Seymour L. Spier, police surgeon of the New Haven police department. The doctor came here to speak at the suggestion of M. D. Millard, district plant chief of the Southern New England telephone company, and included in the large audience were telephone men from Williamstown, Putnam, Danielson and New London.

Dr. Spier explained in a few very plain words the makeup of the human body, and pointed out the difference between the arteries and veins, and the methods to be followed in order to stop a flow of blood from either. In the case of a cut artery a tight bandage should be applied on the side of the cut nearest the heart, the opposite method being pursued in the case of a vein. This stopping the flow of blood from the heart around the body and veins carry the blood back to the heart.

Continuing, the doctor said that if a man at the top of a pole should drop something on his head, or another man's head, causing a bad scalp cut, the flow of blood may be stopped by a piece of a handkerchief or a cloth, circling the man's head around the forehead. This or any other similar bandage should never be left on over one hour at a time as it causes the flow of blood is very liable to cause gangrene. The doctor then explained the various ways of stopping the flow of blood from cuts at various points on the body by simply pressing against the arteries with the fingers.

Dislocations and Fractures.
He then took up dislocations, telling the symptoms of the various cases, including a dislocated shoulder, dislocation of the hip, and a dislocation of the jaw. He explained to the men just what method they ought to pursue to reduce the dislocations. In the case of fractures he advised the use of a splint, and explained to the men how to fashion splints from fence rails or any other piece of wood, and how to apply them.

Foreign bodies in the eye were also touched upon. Dr. Spier told how to neutralize acids and how to neutralize alkali by the use of vinegar, diluted. The three degrees of burns were explained by the doctor and the men were told how to treat them.

ter, Mrs. T. Snowden Thomas. The
trip was made in their automobile.

The ladies of the Scotland road
gathered Thursday afternoon at Mrs.
Allen Latham, where afternoon
tea was served by the hostess and a
social hour passed, the guest of honor
being their long-time neighbor, Mrs.
Harriet Learned Howland.

COUNTY LIQUOR DEALERS

WILL PAY \$45,000 MORE
Under New License Law—Will Add
About \$7,300 to City's Revenue.

Liquor dealers in New London coun-
ty will be obliged to contribute over
\$45,000 more in license fees when the
new law changing the license fee from
\$450 to \$750 goes into effect. As a
result of the change in the law, cities
and towns will receive greater reve-
nue, as will also the county, and the
state, which heretofore received noth-
ing, will come in for 25 per cent of
the fee.

Under the present law, the city or
town in which the license is issued
receives \$450 and the county gets \$45.
Under the new law, the city or town
will get \$457.50, the county will get
\$45.75 instead of \$45, and the state
will receive the sum of \$187.50 on each
license.

Norwich liquor dealers will pay
about \$35,000 more than before and
New London dealers \$21,000.

The increase in fees to this city
will be about \$7,300 and to New Lon-
don about \$5,000.

The receipts of the county from this
source will be \$1,350,000 over
\$45,000. There are 183 licenses in this
county in the \$450 class, of which 74
are in this city, 71 in New London,
and eight in Groton. The other 109
are the druggists' wholesale and beer li-
censes.

Club licenses will be a new prob-
lem for the commissioners to tackle.
Under the new law regularly organ-
ized clubs will be taxed \$100. Whether
it will be up to the commissioners to
determine what is a club within the
meaning of the law is not stated, but
it is expected by the New London
chapters into two rooms by accordion
doors. These two rooms would be for
the kindergarten and primary depart-
ments. The open well in the middle
of Bushnell chapel would be floored
over and the open well in the confer-
ence room would also be floored over
with the removal of partitions at
present on the second floor would
make one large room of the second
floor, 30 feet deep, with classrooms
around the sides. The junior depart-
ment would be placed in the confer-
ence room, the senior department in
the kindergarten room, and the inter-
mediate and senior departments with
a superintendent's platform at the
southern end of the Bushnell chapel,
commanding the entire floor. Ten class
rooms shut off by windows would be
secured in Bushnell chapel on the
second floor. There would be some
